FINANCIAL PERSPECTIVE*

Stabila as the leading contender for the 2022 spotlight.

Stabila's market cap of \$325 mln makes it the most undervalued cryptocurrency in the market. For Stabila to level up with the latest in line, EOS, with a market cap of \$2,814,506,839, the price would have to go up to \$150 just to match the lower limit.

\$17

Stabila has the biggest potential for the next 5 years.

\$150

Stabila has the biggest ROI an investor can envision for 2022.

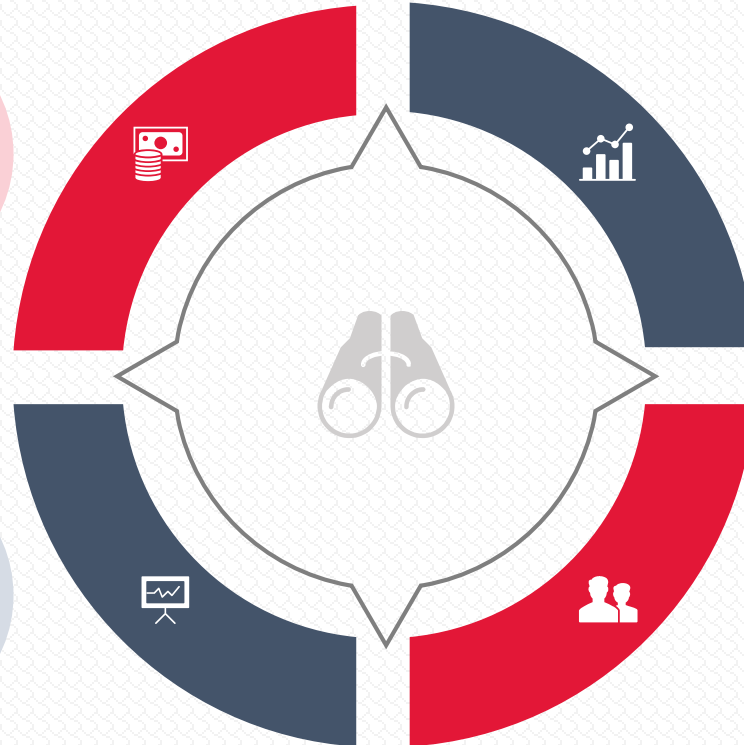

* MAINSTREAM CRYPTOCURRENCIES ONLY
Tokens are useless. This asset class has no value unless it is a security token, real-asset-backed. Asset backing comes in the form of fiat/securities/commodities. In most cases, asset backing is an official process where the token owner has to register the issue with the securities commission.

There are many great cryptocurrencies to look at heading into 2022. However, with stricter market conditions expected and less liquidity as the Fed tapers, we believe investors will have to get more selective with their picks. We think Stabila is the best cryptocurrency to buy right now.
