Feb 2021

Moneta Exchange development.

Mar 2021

Stabila wallet is a digital storage service made for the holding of blockchain assets and carrying out its transactions.

June 2021

Moneta implementation of its own on-chain governance. Stabila blockchain, allows stakeholders to vote for network changes. Proof of Stake (PoS) concept. Stabila is a decentralized blockchain platform that is self-governing and establishes a true digital commonwealth. It is a platform linked to a digital coin, called Stabila or STB. The platform mining is the proof-of-stake consensus mechanism.

Sep 2021

Beta Closed Test. The software is capable of delivering value, but is not ready to be used by everyone due to scaling ongoing development.

Oct 2021

Beta Open Test. Demonstrating the product to potential consumers, and testing among an extremely wide user base. Data Vault development launch.

Nov 2021

Genesis block. Genesis Block is the name of the first block of the Stabila chain. The Genesis Block forms the foundation of the entire Stabila trading system and is the prototype of all other blocks in the blockchain.

THANK YOU

“What we have is a maturation of the crypto market, and we get investors and traders more comfortable understanding the fundamentals around what they’re buying.”

Daniel Varzari, CEO

“Blockchain is a new technological paradigm of our time. It will fundamentally change the principles of work of the whole financial world.”

Igor Scvortov, CFO

“One day in our near future, everything will be tokenized and connected using the blockchain.”

Anastasia Kovaleva, VP Asia
